## TECHNICAL SKILLS:

- .NET, C#, ASP.NET MVC, ASP.NET Web Api, WCF, SQL, Entity Framework, LINQ, JavaScript, AWS

## WORK EXPERIENCE:

**.NET Developer**, Accera, São Leopoldo, RS, Brazil, January 2015 to present

- Design, construction and maintenance of back-end systems using the .NET framework and AWS services, such as Amazon Redshift and Amazon S3. These systems are offered as SaaS to our customers and allow them to have a deeper understanding of the current situation of their supply chain (e.g. visibility of inventory / sales status from partners and possible bottlenecks).
- Collaborated in the development of an internal data quality tool, which allows the customer service team to easily spot and act on problems in the data provided by clients. This tool eliminated a bunch of manual processes that had to be done daily, and also allowed the company to keep a steady number of support employees, even with a considerable growth in the quantity of new customers.

**Analytics Developer Intern**, SAP, Vancouver, BC, May 2014 to September 2014

- Helped with the administration of an internal Business Objects Enterprise (BOE) deployment (e.g. updates to newer patches and service packs)
- Automated and scheduled test cases in order to allow simpler updates in the future
- Solved issues raised by clients

**.NET Developer**, Grupo Meta, São Leopoldo, RS, Brazil, May 2011 to December 2013

- Developed several intranet solutions for Gerdau (a Brazilian steel producer), especially to manage operations of the administration area of the company. Some of these included: a document management system used in Mexico, Colombia and other Latin America countries which helped to reduce logistics lead time; a website to promote a special service offered by Gerdau in Brazil, where customers could have their projects reviewed by specialized engineers; and an online tool to perform 360-degree feedback.

## EDUCATION:

- Bachelor's degree in Information Systems, 2012 - 2017, Unisinos, São Leopoldo, RS, Brazil
- Exchange Student – Computer Science, The University of British Columbia, Vancouver, BC, 2014

## CERTIFICATIONS:

- MSCD: Microsoft Certified Solutions Developer in Web Applications
- MCSP: Microsoft Certified Professional
